

Height Adjustable Tables

The Frames

Carmel's adjustable-height table systems combine unique, sustainable materials with expert design for a state-of-the-art column-and-drive system. Our durable four-piece construction using military-vehicle adhesives to create rich, clean lines without holes, crimp marks, or weld splatter. Anodized aluminum provides a level of durability and environmental responsibility superior to most other materials.

Surfaces

Tops are manufactured with a material laminated, two sides with a finish saturated in melamine resins.

Panels exceed requirement specified in Grade M – 3 of North America's ANSI – A208.1 – 1993. The saturated finish is thermofused to a particle board, therefore the product will never delaminate like high pressure laminates available in 2 in stock colors.

Melamine options:

Wood Veneer tops are made with 3mm American wood veneers using true species with semi-gloss UV finish.

Wood Options:

Build Your Table, It's Easy As 1, 2, 3

Choose You Top Size And Color

Size	Material	List Price
48x24	Melamine	\$140
